Context_000	is_of	software_engineering	The dynamic and demanding context of software engineering requires a code that is adaptable and relevant to new situations as they occur.
Context_000	is	dynamic	
Context_000	is	demanding	
Context_000	requires	code_001	
Code_001	is	adaptable_to_new_situations_as_they_occur	
Code_001	is	relevant_to_new_situations_as_they_occur	
Context_000	is	general	However, even in this generality, the Code provides support for software engineers and managers of software engineers who need to take positive action in a specific case by documenting the ethical stance of the profession.
Code_000	provides_support_for	software_engineer_000	
Code_000	provides_support_for	manager_000	
Software_engineer_000	need_to	take_action_000	
Manager_000	need_to	take_action_000	
Action_000	is	positive	
Action_000	is_taken_in	specific_case	
Action_000	is	documenting_stance_000	
Stance_000	is	ethical	
Stance_000	is_of	profession_000	* This profession is likely indexed in other code
Code_000	provides	foundation_000	The Code provides an ethical foundation to which individuals within teams and the team as a whole can appeal.
Foundation_000	is	ethical	
Foundation_000	appeals	individuals_within_teams	
Foundation_000	appeals	teams_as_a_whole	
Code_000	helps_define	action_001	The Code helps to define those actions that are ethically improper to request of a software engineer or teams of software engineers.
Action_001	is	ethically_improper_to_request_000	
Request_000	is_to	software_engineer_000	
Request_000	is_to	teams_of_software_engineers	
Code_000	is_not_simply_for	adjudicating_nature_of_questionable_acts	The Code is not simply for adjudicating the nature of questionable acts; it also has an important educational function.
Code_000	has	function_000	
Function_000	is	important	
Function_000	is	educational	
Code_000	expresses_consensus_of_profession_000	on_ethical_issues	As this Code expresses the consensus of the profession on ethical issues, it is a means to educate both the public and aspiring professionals about the ethical obligations of all software engineers.
Code_000	is_a_means_to	educate_000	
Code_000	educates_000	the_public	
Code_000	educates_000	aspiring_software_engineers	
Educate_000	is_about	ethical_obligation_of_software_engineer_000	Could be an indexed obligation somewhere
Principle_002	is	CLIENT_AND_EMPLOYER	Principle 2: CLIENT AND EMPLOYER
Software_engineer_000	shall_act_in	manner_000	Software engineers shall act in a manner that is in the best interests of their client and employer, consistent with the public interest.
Manner_000	is_in_best_interest_of	client	
Manner_000	is_in_best_interest_of	employer	
Manner_000	is	consitent_with_public_interest	
Software_engineer_000	shall_provide_service	in_their_areas_of_competence	2.01. Provide service in their areas of competence, being honest and forthright about any limitations of their experience and education.
Software_engineer_000	shall_be_honest_about	limitation_000	
Software_engineer_000	shall_be_forthright_about	limitation_000	
Limitation_000	includes	experience	
Limitation_000	includes	education	
Software_engineer_000	shall_not_knowingly_use	software_000	2.02. Not knowingly use software that is obtained or retained either illegally or unethically.
Software_000	is	obtained_or_retained_illegaly	
Software_000	is	obtained_or_retained_unethically	
Software_engineer_000	shall use 000	property of client or employer	2.03. Use the property of a client or employer only in ways properly authorized, and with the client's or employer's knowledge and consent.
Use_000	only in ways	properly authorized	
Use_000	with_client_or_employer	knowledge	
Use_000	with_client_or_employer	consent	
Software_engineer_000	shall_ensure	document_000	2.04. Ensure that any document upon which they rely has been approved, when required, by someone authorized to approve it.
Software_engineer_000	rely_on	document_000	
Document_000	has_been	approved_000_when_required	p
Approved_000	by	someone_authorized	
Software_engineer_000	shall_keep_private	information_000	2.05. Keep private any confidential information gained in their professional work, where such confidentiality is consistent with the public interest and consistent with the law.
Information_000	is	confidential	
Information_000	is_gained	in_profession_000_work	
Confidentiality_of_information_000	is consistent with	public interest	
Confidentiality_of_information_000	is consistent with	law	
Software_engineer_000	shall identify	project 000	2.06. Identify, document, collect evidence and report to the client or the employer promptly if, in their opinion, a project is likely to fail, to prove too expensive, to violate intellectual property law, or otherwise to be problematic.
Software_engineer_000	shall_document	project_000	
Software_engineer_000	shall_collect_evidence	project_000	
Software_engineer_000	shall_report_project_000	to_client_or_employer_promptly	
Project_000	is_in	software_engineer_000_opinion	
Project_000	is	likely_to_fail	
Project_000	is	too_expensive	
Project_000	violates	intellectual_property_law	
Project_000	is	problematic	
Software_engineer_000	shall_identify_issue_000	to_employer_or_client	2.07. Identify, document, and report significant issues of social concern, of which they are aware, in software or related documents, to the employer or the client.
Software_engineer_000	shall document issue 000	to employer or client	
Software_engineer_000	shall report issue 000	to employer or client	
Issue_000	is of	concern 000	
Issue_000	is	significant	
Concern_000	is	social	
Software_engineer_000	is_aware_of	concern_000	
Issue_000	is_in	software	
Issue_000	is_in	related_documents	
Software_engineer_000	shall_not_accept	work_000	2.08. Accept no outside work detrimental to the work they perform for their primary employer.
Work_000	is	outside	
Work_000	is	detrimental_to_work_001	
Work_001	is_performed_for	primary_employer	
Software_engineer_000	shall_not_promote	interest_000_unless_concern_000_is_compromised	2.09. Promote no interest adverse to their employer or client, unless a higher ethical concern is being compromised.
Interest_000	is_adverse_to	employer_or_client	
Concern_000	is	higher_ethical	

Software_engineer_000	shall_identify	concern_000	Rajan's work
Software_engineer_000	shall_document	concern_000	
Software_engineer_000	shall_report	concern_000	
Concern_000	relates_to	employer	
Concern_000	relates_to	client	Shall report concerns to employer....
Concern_000	is	social	
Software_engineer_000	is aware of	concern 000	

Concern_000	is_in	software		
Concern_000	is_in	related_documents		

principle_6	is	PROFESSION		Principle 6: PROFESSION
Software_engineer_000	shall_advance_000	integrity_of_profession		Software engineers shall advance the integrity and reputation of the profession consistent with the public interest.
Software_engineer_000	shall_advance_000	reputation_of_profession		
Advance_000	is_consistent_with	public_interest		
Software_engineer_000	shall_help_develop	environment_000		6.01. Help develop an organizational environment favorable to acting ethically.
Environment_000	is	organizational		
Environment_000	is	favorable_to_acting_ethically		
Software_engineer_000	shall_promote	knowledge_000		6.02. Promote public knowledge of software engineering.
Knowledge_000	is	public		
Knowledge_000	is_of	software_engineering		
Software_engineer_000	shall_extend_000	knowledge_000		6.03. Extend software engineering knowledge by appropriate participation in professional organizations, meetings and publications.
Extend_000	by	participation_000		
Participation_000	is	appropriate		
Participation_000	is_in	professional_organizations		
Participation_000	is_in	professional_meetings		
Participation_000	is_in	professional_publications		
Software_engineer_000	shall	support_000		6.04. Support, as members of a profession, other software engineers striving to follow this Code.
Support_000	as	members_of_a_profession		
Software_engineer_000	support_000	software_engineer_001		
Software_engineer_001	strive_to_follow	code_000		
software_engineers	not_promote	interest_000		6.05. Not promote their own interest at the expense of the profession, client or employer.
Interest_000	is_of	software_engineer_000_own		
Interest_000	is_at_expense_of	profession_000		
Interest_000	is_at_expense_of	client		
Interest_000	is_at_expense_of	employer		
Software_engineer_000	shall	obey_000		6.06. Obey all laws governing their work, unless, in exceptional circumstances, such compliance is inconsistent with the public interest.
Obey_000	laws	governing_work		
Obey_000	unless	circumstance_000		
Obey_000	is_equal_to	compliance_000		
Circumstance_000	is	exceptional		
Compliance_000	is_inconsistent_with	public_interest	in_circumstance_000	
Software_engineer_000	shall_be	accurate_000		6.07. Be accurate in stating the characteristics of software on which they work, avoiding not only false claims but also claims that might reasonably be supposed to be speculative, vacuous, deceptive, misleading, or doubtful.
Accurate_000	in	stating_characteristic_000		
Characteristic_000	is_of	software_001		
Software_engineer_000	work_on	software_001		
Software_engineer_000	shall_avoid	claim_000		
Claim_000	is	false		
Claim_000	might_reasonably_be	speculative		
Claim_000	might_reasonably_be	vacuous		
Claim_000	might_reasonably_be	deceptive		
Claim_000	might_reasonably_be	misleading		
Claim_000	might_reasonably_be	doubtful		
Software_engineer_000	shall_take	responsibility_000		6.08. Take responsibility for detecting, correcting, and reporting errors in software and associated documents on which they work.
Responsibility_000	is_for	detecting_software_002		
Responsibility_000	is_for	correcting_software_002		
Responsibility_000	is_for	reporting_software_002		
Software_002	contains	errors		
Software_002	includes	associated_documents		
Software_engineer_000	work_on	software_002		
Software_engineer_000	shall_ensure_clients_know	commitment_000		6.09. Ensure that clients, employers, and supervisors know of the software engineer's commitment to this Code of ethics, and the subsequent ramifications of such commitment.
Software_engineer_000	shall_ensure_employers_know	commitment_000		
Software_engineer_000	shall_ensure_supervisors_know	commitment_000		
Commitment_000	is_to	code_000		
Commitment_000	has	ramifications		
Software_engineer_000	shall_avoid	association_000		6.10. Avoid associations with businesses and organizations which are in conflict with this code.
Association_000	is_with	business_000		
Association_000	is_with	organization_000		
Business_000	is_in_conflict_with	code_000		
Organization_000	is_in_conflict_with	code_000		
Software_engineer_000	shall_recognize	violation_000		6.11. Recognize that violations of this Code are inconsistent with being a professional software engineer.
Violation_000	is_of	code_000		
Violation_000	is_inconsistent_with	being_software_engineer_000		
Software_engineer_000	shall_express_000	concern		6.12. Express concerns to the people involved when significant violations of this Code are detected unless this is impossible, counter-productive, or dangerous.
Express_000	to	people_involved		
Violation_000	is	significant		
Express_000	when	violation_000_detected		
Express_000	unless	impossible		
Express_000	unless	counter_productive		
Express_000	unless	dangerous		
Software_engineer_000	shall_report_000	violation_000		6.13. Report significant violations of this Code to appropriate authorities when it is clear that consultation with people involved in these significant violations is impossible, counter-productive or dangerous.
Report_000	is_to	appropriate_authorities		
Report_000	when_it_is_clear	consultation_000		
Consultation_000	is_with	people_involved_with_violation_000		
Consultation_000	is	impossible		
Consultation_000	is	counter_productive		
Consultation_000	is	dangerous
